

'Season's Greetings' by Martine Viergever

With the launch of 'Season's Greetings', Martine Viergever embraces her own view on seasonal changes in fashion. The thematical clichés commonly used in seasonal sales served as the starting point in designing this collection, plunging into autumn feelings for inspiration.

Season's Greetings became a jewellery and accessory collection with personal and nostalgic tones, conjuring up memories of dark and rainy autumn days spent at the kitchen table, tinkering with chestnuts and acorns. Season's Greetings consists mainly of small autumn arrangements, created with matches, saté sticks and autumn fruits, made entirely in silver.

With 'Season's Greetings' Martine Viergever gives a personal salutation to a new fashion season.
